# Senior Manufacturing Manager

Location: Downtown Toronto

Starting Date: October 2009

## Qualifications

Master's or Bachelor's in engineering, P.Eng. with meaningful work experience

## Required Knowledge

The candidate must have a strong background in managing manufacturing operations. Of critical importance is the candidate's ability to oversee scale up from low volume prototyping to high volume fabrication. The candidate must have a firm grasp of Product Certification methods and protocols. Industry experience in any of the following would be considered a strength: concentrated photovoltaic, automotive headlamp assemblies, robust consumer electronics (products like Blackberries) or durability products involving a combination of polymers, electronics, optics being produced at large volumes.

Only highly innovative candidates will be considered.

## Desirable Skills and Knowledge

- Manufacturing Line Management and Engineering Team Management
- Knowledge of working with polymer components
- Automated Assembly
- High volume fastening and bonding methods for polymers aluminum
- Automated Packaging Systems
- Computer Vision aided quality control
- Integration of electrical subassemblies
- Automated electrical soldering techniques
- Familiarity with ISO, UL, CSA and other standards
- Supply chain management

## About the Position

Morgan Solar is developing new solar power technologies which are unlike anything else. The company has tremendous potential and needs enthusiastic and smart people to help the company grow. The candidate must be prepared for the rigors of working with a startup.

Compensation will be commensurate with the hire's qualifications.
