Re: Alberta Solar One Solar Project — Opportunities for Involvement

Dear Stakeholder:

Thank you for your ongoing interest in the Alberta Solar One solar power project. As you may know, Alberta Solar One Inc. is proposing to develop a 9.5-megawatt (MW) solar energy project in your area, called Alberta Solar One (the Project). The Project is approximately four kilometres west of the hamlet of Burdett, Alberta. The Project will occupy approximately 50 percent of quarter section NE-21-10-12-W4M near the intersection of Range Road 123 and Township Road 104. We have updated the Project schedule and Project details.

The Project is being developed by Alberta Solar One Inc., a joint venture between Enbridge Inc. and Morgan Solar, Inc. The Project will use Morgan Solar Inc.'s SimbaX modules on Savanna dual-axis PV trackers. This means that the solar modules will rotate with the sun's movement.

Accompanying this letter are several related documents:

- a Project-specific information package with an overview of the Project details and other consultation information;
- a Project Map, showing the Project boundary and site plan;
- visual simulations showing the Project from multiple locations; and
- the Alberta Utilities Commission Brochure, *Public involvement in a proposed utility development*, outlining your rights and options for participating in the proceedings.

### Contact Us

We welcome your feedback on the Project! We are committed to continuing to engage with the community, landowners, and local government — both as we move toward Project permitting and construction and throughout the Project's life. Your comments and concerns are important to us.

Further information is available on our website at [www.morgansolar.com](http://www.morgansolar.com). If you have any questions or concerns regarding the Project, please contact me at **1-416-403-1655** or [abs1@morgansolar.com](mailto:abs1@morgansolar.com).

Samuel Buckstein  
Project Coordinator — Alberta Solar One Project

**Your privacy:** Your feedback will be used in our application to the AUC, in compliance with the AUC process. This information may become publicly available through its website. If you have questions about how your feedback will be used, please contact us. You can also contact the AUC directly at 780-427-4903. Please see the attached AUC brochure “Public Involvement in a Proposed Utility Development” for more details on the public involvement process for utility development.
